

March 21-23, 2018

Querétaro City, Mexico

Hotel Misión Juriquilla

Secretariat: CEESI

Registration Fee: U.S. \$350

2018 International Symposium on Fluid Flow Measurement (ISFFM)

WHY SHOULD YOU ATTEND ISFFM?

State-of-the art flow measurement is an important component of many technologies that we require on a daily basis. Learn about the newest advances in fluid flow measurement instrumentation and methods at the 2018 International Symposium on Fluid Flow Measurement (ISFFM). World renowned fluid flow measurement specialists from industry, academia and government will present their latest results in more than 50 technical presentations in parallel sessions.

TOPICS WILL INCLUDE:

- Current and new meter technologies
- Custody transfer, industrial, and laboratory applications
- Velocimetry
- Critical flow
- Micro flow measurement
- Wet gas and multiphase flow
- Fluid properties, analytical methods, sampling
- Calibration facilities
- Inter-comparison test programs
- Measurement uncertainty
